

**AMENDMENTS TO THE SPECIFICATION**

Please replace paragraph [0100] with the following amended paragraph:

For a parameter kit, the number of mesh-division in the three axial directions are set as division control parameters as shown in FIG. 5, in which the number of the mesh-division in the two axial directions, X-direction and Y direction, are shown. In the example shown in FIG. [[5A]] 5, the number of the mesh-division in X-direction is set at "9", and the number of the mesh-division in Y-direction is set at "12" for the analytical target model (component) shown with thick solid lines. Only the number of the mesh-division in X-direction and Y-direction are explained here, but the number of the mesh-division in Z-direction is also set in the same manner.
